Affiliate Marketing Overview

Affiliate marketing is a marketing practice in which a business rewards one or more affiliates for each visitor or customer brought about by the affiliate's own marketing efforts. Marketing your site via customer channel is one of the most effective and least expensive ways to achieve higher targeted traffic, and increase sales.

Affiliate Pro Introduction

Affiliate Pro is a good solution for you to create your own affiliate program, which is an essential marketing tool for every online business. This module also offers a flexible invitation program and banner creating supported.

Your clients will be provided links and banners to share with their friends via mail or place on their own site, blog... or any social networking such as Facebook, Twitter...

If referee purchase products, referral can get commission and referee might get discount. The commission will be added to client's current balance and they can withdraw or use to checkout. By this way, your customer can contribute to make your marketing strategy become more efficient.

Back-end Overview

In back-end, Affiliate Pro includes six tabs, which help admin manage affiliate programs, affiliate members as well as member's information and activities.

Manage Program: add and modify Affiliate programs.

Manage Banners: add and modify Affiliate Banners.

Manage withdrawals: having two sub-tabs (all withdrawals, pending withdrawals) aim to provide a general look for admin all withdrawal requests of clients (both manual and auto) and their status.

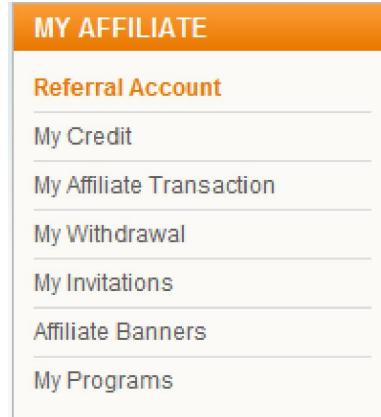

Manage Transaction: manage credit history (credit change - by order) and affiliate history (commission and discount - by customer).

Manage Members: manage all affiliate members (both active and pending). Admin can accept registration request of new members here by changing status.

Configuration: admin can set general configuration for Affiliate module here.

Front-end Overview

At front-end, every Affiliate member has own area to manage their affiliate called My Affiliate. Client can invite friend at the tab My Invitation or using Affiliate Banners. They can view and join programs at My Program, change information at Referral Account and manage credit, affiliate transaction at two left tabs.

Common Rules

- Every member has their own link and banner to share.
- Affiliate member must join any available programs for getting commission.

- Affiliate module offers per-product commission and discount tracking.
- Tracking commission by per sale not by per click (only count for closed purchase).
- If customer A is Affiliate member, customer B is invited by customer A (clicked on referral link), we consider some cases:
 - Customer B (not register) buys an order on referral link (this order contains products that belong to customer A's joined program) => customer A receives commission and customer B receives discount (if any).
 - Any times customer B (registered) buys orders (these order contain products that belong to program, which customer A joined) => customer A receives commission and customer B receives discount (if any).
 - Customer B takes part in Affiliate (became Affiliate member), joined same programs with customer A => commission will be counted for customer A.
 - Customer A buys products that belong to his joined programs => he will get both commission and discount (if any).
 - Customer A and B were joined same programs, customer A's referral account was locked => customer B will get both commission and discount (if any) if buying products of those program.

Installation

1. Copy app/, js/ and skin/ folders to your Magento location. There is no file should be replaced.
2. Go to **Admin – Affiliate Pro** to manage member, department and ticket.
3. Go to **Admin – Configuration – Mage World – Affiliate Pro** to change the configuration.
4. Remember to refresh cache.

Note that: If you meet the problem of “Access Denied”, please logout and login again. Any questions, free ask us by post a ticket at <http://www.mage-world.com/contacts>

General Setting

To guarantee that the Affiliate module work properly, you should follow some steps below:

1. Enable this module at **Setting/Configuration/Mage World/Affiliate Pro** or simply click on the tab **Configuration** in the menu **Affiliate Pro** at backend.
2. Do some general setting at configuration (Please view detail at [User Guide/Admin/Configuration](#)).
3. Create Affiliate programs (please view detail at [User Guide/Admin/How to create and manage program](#)).
4. Activate affiliate members’ accounts (please view detail at [User Guide/Admin/Manage Affiliate Members](#)).
